"First All New Tactics Manual in Over a Decade"

FIRE OFFICER'S HANDBOOK OF TACTICS

JUST PUBLISHED!

Much Needed Update of the "How-To" Techniques of Modern Firefighting

Utilizing the Latest Advances in Equipment

JOHN NORMAN

by John Norman, Lt. FDNY, First Asst. Chief Inwood (NY), Instructor Nassau County NF (NY) Fire Service Academy; Contributing Editor and author of monthly "Fireground Tactics" column in Firehouse Magazine.

This comprehensive handbook guides firefighters and officers on specific practical methods of handling emergencies. Keeps them on top of the new developments in the field so important to life safety. How to select the proper method to fit a situation and how to solve the problems as quickly as possible.

CONTENTS: Part General Firefighting Tactics. Establishes the ground rules for most structural firefighting and concepts that should be applied as a part of standard operating procedures. General Principles, Size-up, Engine operation considerations, Fire hose selection - stretching principle, Water supply, standpipe and sprinkler, Ladder company operations, Forcible entry, Ventilation, Search and rescue. Part II Specific Fire Situations. Deals with fire and emergencies in most common structures and occupancies. Privacy and the home, Public and commercial buildings, High rises, Buildings under construction or renovation. Fire related emergencies - incendies, oil, gasoline leaks, Collapse.
