

# Fire Engineering Weekly C.O.R.E. Drills

## Company Operational Readiness Exercises #7

Job / Area	Skill or Knowledge Drill
<b>Firefighter</b>	Operate all power saws used by your department.
<b>Driver / Operator</b>	Demonstrate procedures for operating portable electrical equipment — Start all generator or AC power devices
<b>Company Officer</b>	Review your department employee evaluation system. If one is not present, consider how you communicate department and your expectations of members assigned to you.
<b>Shift Commander</b>	A piece of equipment has gone missing from an apparatus in your station and it has not been logged as missing on any inventories. What is your action
<b>Hazardous Materials</b>	What is the significance of a product that is water soluble if it is spilled into a waterway?
<b>Technical Rescuer</b>	What are your first actions taken when arriving at the scene of a trench rescue with a conscious victim trapped by a soil collapse?
<b>EMT</b>	Review treatment of a possible fracture to the lower leg.
<b>Paramedic</b>	Review SOP/SOG on Anaphylaxis
<b>Street of the Day</b>	INSERT A LOCAL STREET / GRID / BUILDING IN THIS SPACE
<b>Fitness Exercise of the Day</b>	Cool Down! How do you cool down and recover from a strenuous workout period?
<b>Word of the Day</b>	Heat Release Rate
<b>Quote of the Day</b>	<i>"We are what we repeatedly do. Excellence, then, is not an act, but a habit."</i> Aristotle
